Eye Problems That Are Specific to Certain Horse Breeds

Some ocular diseases in horses are diagnosed more frequently in certain breeds and may be attributable to genetic predispositions that affect the horse’s response to the disease. Read more about eye diseases in breeds of horses.

Treatment of Ocular Disease at UF

Many ophthalmic issues require around-the-clock care for optimal treatment. The UF Large Animal Hospital has veterinarians and technicians on-staff 24 hours a day to provide the best possible care. Contact us to discuss treatment of ocular disease.

Equine Ocular Diseases

Many ophthalmic issues require advanced treatment and intensive therapy that is not possible at home. Learning about diseases of the horse’s eye and how they are treated can help horse owners know when to call the veterinarian. Read about equine ocular diseases.
