Our Equine Lameness & Imaging Service just got better.

The UF Large Animal Hospital is excited to announce the opening of our Equine Sports Performance Complex. The complex will be a valuable resource to all services, specifically Equine Lameness & Imaging, Surgery, Medicine, and our farrier. Learn more.
Common uses for equine regenerative medicine are tendon & ligament injuries, cartilage damage, osteoarthritis, fractures and wound repair. Learn more.

MRI shows abnormalities with greater precision & detail than other imaging modalities, and is often used when other diagnostics are inconclusive. Learn more.

Our farrier works under the direction of the surgeons and sports medicine & rehabilitation veterinary specialists at the UF Large Animal Hospital. Learn more.

Success Story
Read about Wyatt and the preventative colic procedure performed at UF. Since the surgery in 2007, Wyatt hasn’t required additional surgical procedures and his frequency and intensity of colic episodes has dramatically decreased. Learn more.

Large Animal Surgery Resident Wins American Association of Veterinary Clinicians Award
Our third year surgery resident, Dr. Andrew Smith, was selected from all veterinary residents in North America to win the award. Learn more.

Bad EPM Drug
Eight horses that were given a single dose of an EPM drug in Ocala, FL had neurologic disturbances within 36 hours of administration. The FDA confirmed the suspicions of the drug manufactured by a compounding pharmacy. Learn more.
